

## Kiemprijs

### Categorie Medical Microbiology:

Dhr. Angelino Tromp, UMC Utrecht: Human CD45 is an F-component-specific receptor for the staphylococcal toxin Pantón–Valentine leucocidin

[A.t.tromp-3@umcutrecht.nl](mailto:A.t.tromp-3@umcutrecht.nl)

### Categorie Genral Microbiology:

Mw. Dani Heesterbeek, UMC Utrecht, Bacterial killing by complement requires membrane attack complex formation via surface-bound C5 convertases

[d.a.c.heesterbeek-2@umcutrecht.nl](mailto:d.a.c.heesterbeek-2@umcutrecht.nl)

### Categorie Microbial Ecology:

Mw. Karina Ranijan, LUMC, Stress-induced formation of cell wall-deficient cells in filamentous actinomycetes

[d.claessen@biology.leidenuniv.nl](mailto:d.claessen@biology.leidenuniv.nl)

(deze inzending is dus ingestuurd door haar opleider, Dennis Claessen, correspondentie verloopt via hem)

## Van Leeuwenhoekaward

Mw. D.A.C. Stapels, UMC Utrecht, *Salmonella* persists undermine host immune defenses during antibiotic treatment

[d.a.c.stapels@umcutrecht.nl](mailto:d.a.c.stapels@umcutrecht.nl)

## Westerdijk Award

### Categorie general microbiology

Dhr. Maarten Verhoeven, TU Delft, Novel genetic parts and cultivation strategies for yeast-based conversion of lignocellulosic feedstocks.

[Maarten.verhoeven@dsm.com](mailto:Maarten.verhoeven@dsm.com)

### Categorie clinical microbiology

Mw. Anne Voor in 't holt, Erasmus MC, Risk factors and transmission of healthcare-related pathogens

Ingediend via Prof. Vos en Dr. Severin

### Categorie host-pathogen interaction

Mw. N.W.M. de Jong, UMC Utrecht, Immune evasion by *Staphylococcus aureus*: expanding the repertoire.

[Njong4@umcutrecht.nl](mailto:Njong4@umcutrecht.nl)
