

Prijswinnaars 2023

Westerdijk Award:

Pengfei Li

Category: Medical microbiology

Titel proefschrift: Tackling emerging viral diseases with epidemic potential

Heike Becker

Category: General and molecular microbiology

Titel proefschrift: microbial perturbations in Crohn's disease

Sergio Tomas Martinez

Category: Microbial ecology

Titel proefschrift: Extracellular polymeric substances of *Vandidatus Accumulibacter*; composition, application and turnover

Kiemprijs:

Pengfei Li

Categorie: General medical microbiology

Publicatie Mpox virus infection and drug treatment modelled in human skin organoids. *Nature Microbiology*. 2023 Nov;8(11):2067-2079

Francesc Corbera Rubio

Categorie: Microbial ecology

Publicatie: *Meta-imics profilin of full-scale groundwater rapid sand filters explains stratification of iron, ammonium and manganese removals. Water Research volume 233, 15 april 2023, 119805*

Van Leeuwenhoek Award

Adela Melcrova

Publicatie: Lateral membrane organization as target of an antimicrobial peptidomimetic compound. *Nature communications* (2023)14:4038

Category: general microbiology

Johan van der Plas

Publicatie: Causal chemoprophylactic activity of cabamiquine against *Plasmodium falciparum* in a controlled human malaria infection: a randomised, double-blind, placebo-controlled study in the Netherlands.
