

NWKV Webinar on Emerging Arbovirus Infections

December 3, 2024, 13:00-14:30 CET

On December 3, the Dutch Working group on Clinical Virology (NWKV) will organize a webinar on the latest developments in emerging arbovirus infections. Local speakers will discuss the (re)emergence of dengue virus, Oropouche virus, and West Nile virus, in their respective regions and settings.

We are honored to have **Prof. Francisco J. Diaz, clinical virologist and arbovirus expert in Medellin, Colombia, as a guest speaker.**

Please feel free to share this invitation with professionals interested in this topic; the webinar is open for both NWKV and ESCV members, as well as non-members.

13:00-13:05 Opening

13:05-13:25 (20 min)

ABCDEngue: Addressing Barriers and Challenges During the Dengue outbreak across the ABC-Islands
